- Coomera Connector
- Maroochydore to Mons Rd (Bruce Hwy)
- Tambourine Mtn landslide remediation
- Caloundra Rd to Sunshine Motorway (Bruce Hwy)
- TMR slope risk assessments

## CLIENTS

**We are more than excellent engineers. We also choose to make a difference.**

**So we became Australia's only certified engineering social enterprise.**

**We invest 50% of our profits to create learning opportunities for young people.**

When you work with us, you help create new learning opportunities for young people.

“ Many young people face barriers which can put them at risk of not fulfilling their potential. When young people are supported, listened to, and shown what is possible and how to get there, it opens their minds to what they can achieve. CGC's team has mentored our students, taken them on field trips, and delivered hands-on workshops. These experiences have inspired our students, built their confidence and created pathways for their futures. We are so grateful for CGC's practical and financial support. It's making a real difference in the learning journeys of our students.

Katrina Zagaglioni, Technologies Head of Department, Woodridge State High School
